

## **Toshiko Mori: Architect Observations presented at GSD Faculty colloquium series**

The Harvard GSD faculty colloquium series event on the 20<sup>th</sup> of November proved an excellent opportunity for Toshiko Mori to introduce her new book, *Toshiko Mori: Architect Observations*. Andres Lepik of the Architekturmuseum München, Landon Brown, director at VisionArc and Nicholas Fox Weber, Executive Director of the Josef and Anni Albers Foundation, Executive Director joined her for the occasion. Our very own Cristina Steingraber was present to introduce the participants and the book concept. About 110 people tuned in to the event organised by the Frances Loeb Library, to listen to Toshiko Mori discuss the book and give an insight into the stunning projects presented, such as the *Thread and Fass School and Teachers' Residence*. Nicholas fox Weber was able to give futher insights into Toshiko Moris work from an outside perspective with reference to this particular project. A favourite moment for us at Architangle was the sneak peek of the stunning, denim-look linen bound volume which Toshiko browsed through on screen.
